English

👤 Profile

Aspiring Frontend Developer with a strong foundation in HTML, CSS, JavaScript, and React. Experienced in building responsive web apps using modern tools like Chakra UI and Firebase. Currently developing a full-stack Money Tracker app with login functionality and database integration using SQL. Fast learner with a background in team coordination and process improvement, now focused on transitioning into a tech role. Open to remote or on-site junior frontend developer opportunities.

💼 Work Experience

PT. Yanmarindo Perkasa | 📍Pekanbaru, Indonesia
Sales & Admin Operations Coordinator | June 2023 – Present
Responsible admin tasks while growing leadership and tech interest

2023 – Present

- Managed order processing, invoice documentation, and shipment coordination
- Trained and supported 4+ junior staff members, helping them succeed in their roles
- Introduced new ideas and process improvements adopted by supervisors
- Recognized for being reliable, detail-oriented, and a team player
- Created Excel-based reports and trackers to improve team efficiency
- Currently upskilling in frontend development through self-learning and hands-on project work

🔍 Project

✓ Random Workout Generator

A web app that generates random workouts with interactive features.
Tech Stack: React, Chakra UI, JavaScript, Vite, Github Pages
Deploy : https://random-workout-steel.vercel.app
Repository: github.com/HendraSiswanto/random-workout
Demo Video: https://youtu.be/ggDpi3d_faU

- Generates random exercises with checkboxes
- Includes built-in workout timer
- Clean UI with Chakra components and animation

Technical Highlights: Implemented a custom countdown timer using useEffect and setTimeout. Used Chakra UI Grid and Flex components for mobile-first design, Handled routing and build for GitHub deployment

🔧 In Progress

✓ Money Tracker App

- Implements Google login & secure user sessions
- Users can log daily expenses and review history
- Currently integrating backend with SQL database

🧠 Technical Training

- React Fundamentals – Programming with Mosh (YouTube)
- Firebase Auth & Firestore – Firebase Docs (Self-Study)
- Git & GitHub Basics – Traversy Media (YouTube)
- Website Development (HTML, CSS, JavaScript) - Supersimpledev (YouTube)
